

**Publication criteria for nationally notifiable conditions reported to the National Notifiable Diseases Surveillance System, 2018.**

<b>Code</b>	<b>Notifiable condition</b>	<b>Publication criteria<sup>*,†,§</sup></b>
11090	<i>Anaplasma phagocytophilum</i>	Confirmed and probable
10350	Anthrax	Confirmed and probable
12010	Babesiosis	Confirmed and probable
10530	Botulism, foodborne	Confirmed
10540	Botulism, infant	Confirmed
10550	Botulism, other (includes wound)	Confirmed
10548	Botulism, other (unspecified)	Confirmed
10549	Botulism, wound	Confirmed
10020	Brucellosis	Confirmed and probable
11020	Campylobacteriosis	Confirmed and probable
10273	Chancroid	All reports
10073	Chikungunya virus diseases	Confirmed and probable
10274	<i>Chlamydia trachomatis</i> infection	All reports
10470	Cholera (toxigenic <i>Vibrio cholerae</i> O1 or O139)	Confirmed
11900	Coccidioidomycosis	Confirmed
11640	Crimean-Congo hemorrhagic fever	Confirmed
11580	Cryptosporidiosis	Confirmed and probable
11575	Cyclosporiasis	Confirmed and probable
10680	Dengue	Confirmed and probable
11705	Dengue, severe	Confirmed and probable
11704	Dengue-like illness	Confirmed and probable
10040	Diphtheria	Confirmed, probable, and unknown*
10053	Eastern equine encephalitis virus disease, neuroinvasive	Confirmed and probable
10062	Eastern equine encephalitis virus disease, nonneuroinvasive	Confirmed and probable
11630	Ebola hemorrhagic fever	Confirmed
11088	<i>Ehrlichia chaffeensis</i>	Confirmed and probable
11089	<i>Ehrlichia ewingii</i>	Confirmed and probable
11091	Ehrlichiosis/Anaplasmosis, undetermined	Confirmed and probable
11570	Giardiasis	Confirmed and probable
10280	Gonorrhea	All reports
11648	Guanarito hemorrhagic fever	Confirmed
10590	<i>Haemophilus influenzae</i> , invasive disease	Confirmed, probable, and unknown
10380	Hansen's disease (Leprosy)	Confirmed
11610	Hantavirus infection, non-Hantavirus pulmonary syndrome	Confirmed
11590	Hantavirus pulmonary syndrome (HPS)	Confirmed
11550	Hemolytic uremic syndrome, postdiarrheal (HUS)	Confirmed and probable
10110	Hepatitis A, acute	Confirmed
10100	Hepatitis B, acute	Confirmed

<b>Code</b>	<b>Notifiable condition</b>	<b>Publication criteria<sup>*,†,§</sup></b>
10104	Hepatitis B, perinatal infection	Confirmed
10101	Hepatitis C, acute	Confirmed and Probable
50248	Hepatitis C, perinatal infection	Confirmed
	HIV diagnoses	Confirmed
11061	Influenza-associated pediatric mortality	Confirmed
11723	Invasive pneumococcal disease ( <i>Streptococcus pneumoniae</i> , invasive disease) (all ages)	Confirmed and probable
10078	Jamestown Canyon virus disease, neuroinvasive	Confirmed and probable
10079	Jamestown Canyon virus disease, non-neuroinvasive	Confirmed and probable
11638	Junin hemorrhagic fever	Confirmed
10081	La Crosse virus disease, neuroinvasive	Confirmed and probable
10082	La Crosse virus disease, non-neuroinvasive	Confirmed and probable
11632	Lassa fever	Confirmed
10490	Legionellosis	Confirmed
10390	Leptospirosis	Confirmed and probable
10640	Listeriosis	Confirmed
11644	Lujo virus	Confirmed
11080	Lyme disease	Confirmed and probable
11637	Machupo hemorrhagic fever	Confirmed
10130	Malaria	Confirmed
11631	Marburg fever	Confirmed
10140	Measles (rubeola), total	Confirmed and unknown
10150	Meningococcal disease ( <i>Neisseria meningitidis</i> )	Confirmed and probable
10180	Mumps	Confirmed, probable, and unknown
11062	Novel influenza A virus infections, initial detections of	Confirmed
50236	Paratyphoid fever (caused by <i>Salmonella</i> serotypes Paratyphi A, Paratyphi B [tartrate negative], and Paratyphi C)	Confirmed and probable
10190	Pertussis (Whooping Cough)	Confirmed, probable, and unknown
10440	Plague	Confirmed
10410	Poliomyelitis, paralytic	Confirmed
10405	Poliovirus infection, nonparalytic	Confirmed
10057	Powassan virus disease, neuroinvasive	Confirmed and probable
10063	Powassan virus disease, non-neuroinvasive	Confirmed and probable
10450	Psittacosis (Ornithosis)	Confirmed and probable
10257	Q fever, acute	Confirmed and probable
10258	Q fever, chronic	Confirmed and probable
10340	Rabies, animal	Confirmed
10460	Rabies, human	Confirmed

Code	Notifiable condition	Publication criteria*,†,§
10200	Rubella	Confirmed and unknown
10370	Rubella, congenital syndrome (CRS)	Confirmed, probable, and unknown
11639	Sabia-associated hemorrhagic fever	Confirmed
50242	Salmonellosis, (excluding paratyphoid fever and typhoid fever )	Confirmed and probable
10575	Severe acute respiratory syndrome-associated coronavirus (SARS-CoV) disease	Confirmed and probable
11563	Shiga toxin-producing <i>Escherichia coli</i> (STEC)	Confirmed and probable
11010	Shigellosis	Confirmed and probable
11800	Smallpox	Confirmed and probable
10250	Spotted fever rickettsiosis	Confirmed and probable
10051	St. Louis encephalitis virus disease, neuroinvasive	Confirmed and probable
10064	St. Louis encephalitis virus disease, nonneuroinvasive	Confirmed and probable
11700	Streptococcal toxic shock syndrome	Confirmed and probable
10316	Syphilis, congenital	All reports
10313	Syphilis, early non-primary, non-secondary	All reports
10311	Syphilis, primary	All reports
10312	Syphilis, secondary	All reports
10310	Syphilis, total primary and secondary	All reports
10320	Syphilis, unknown duration or late	All reports
10210	Tetanus	All reports
10520	Toxic shock syndrome (other than streptococcal) (TSS)	Confirmed and probable
10270	Trichinellosis	Confirmed and probable
10220	Tuberculosis	Confirmed
10230	Tularemia	Confirmed and probable
10240	Typhoid fever (caused by <i>Salmonella typhi</i> )	Confirmed and probable
11663	Vancomycin-intermediate <i>Staphylococcus aureus</i> (VISA)	Confirmed
11665	Vancomycin-resistant <i>Staphylococcus aureus</i> (VRSA)	Confirmed
10030	Varicella morbidity (Chickenpox)	Confirmed and probable
	Varicella mortality	Confirmed and probable
11545	Vibriosis (any species of the family <i>Vibrionaceae</i> , other than toxigenic <i>Vibrio cholerae</i> O1 or O139)	Confirmed and probable
10056	West Nile virus disease, neuroinvasive	Confirmed and probable

<b>Code</b>	<b>Notifiable condition</b>	<b>Publication criteria<sup>*,†,§</sup></b>
10049	West Nile virus disease, nonneuroinvasive	Confirmed and probable
10052	Western equine encephalitis virus disease, neuroinvasive	Confirmed and probable
10065	Western equine encephalitis virus disease, nonneuroinvasive	Confirmed and probable
10660	Yellow fever	Confirmed and probable
50224	Zika virus disease, congenital	Confirmed and probable
50223	Zika virus disease, non-congenital	Confirmed and probable
50222	Zika virus infection, congenital	Confirmed and probable
50221	Zika virus infection, non-congenital	Confirmed and probable

\* An unknown case classification status is used when a reporting jurisdiction sends aggregate counts of cases or when the surveillance information system of a reporting jurisdiction does not capture case classification data. In both situations, cases are verified to meet the case classification (e.g., confirmed, probable, and suspected) specified in the publication criteria.

† Publication criteria for the National Notifiable Diseases Surveillance System (NNDSS): for a case report of a nationally notifiable disease to be published in the tables, the reporting state or territory must have designated the disease reportable in their state or territory for the year corresponding to the year of report to CDC. After this criterion is met, the disease-specific criteria listed in the above table are applied. When the above-listed table indicates that all reports will be earmarked for publication, this means that cases designated with unknown or suspect case confirmation status will be published just as probable and confirmed cases will be published. Because CSTE position statements customarily are not finalized until July of each year, NNDSS data for the newly added conditions usually are not available from all reporting jurisdictions until January of the year following the approval of the CSTE position statement.

§ Based on case classification status.
