

ERRATUM: Weeks 1-52 data for *Haemophilus influenzae*, invasive disease in Table 1 were updated on Monday, February 11, 2019. Labels for "Nontypeable" and "Non-b serotype" were incorrectly placed resulting in the numbers being switched for these two rows. They are now correct.

National Notifiable Infectious Diseases: Weekly Tables

TABLE 1. Weekly cases* of selected infrequently reported notifiable diseases (<1,000 cases reported during the preceding year), excluding U.S. territories -- United States, week ending December 1, 2018 (WEEK 48) †
(Accessible Version: <https://wonder.cdc.gov/nndss/static/2018/48/2018-48-table1.html>)

Disease				Total cases reported for previous years					States reporting cases during current week (Count)
	Current week	Cum 2018	5-year weekly average§	2017	2016	2015	2014	2013	
Anthrax	-	1	-	-	-	-	-	-	
Arboviral diseases, neuroinvasive and non-neuroinvasive ¶¶									
Chikungunya virus disease	-	83	4	156	247	896	NN	NN	
Eastern equine encephalitis virus disease	-	5	0	5	7	6	8	8	
Jamestown Canyon virus disease	-	34	0	75	15	11	11	22

-: No reported cases – The reporting jurisdiction did not submit any cases to CDC.

N: Not reportable – The disease or condition was not reportable by law, statute, or regulation in the reporting jurisdiction.

NA: Not available – CDC does not have data because of nomenclature changes in how data are reported for nationally notifiable conditions.

NN: Not nationally notifiable – This condition was not designated as being nationally notifiable.

NP: Nationally notifiable but not published – CDC does not have data because of changes in how conditions are categorized.

Cum: Cumulative year-to-date counts.

* Case counts for reporting year 2018 are provisional and subject to change. Data for years 2013 through 2017 are finalized.

Notes:

- These are **weekly** cases of selected infectious national notifiable diseases, from the National Notifiable Diseases Surveillance System (NNDSS). NNDSS data reported by the 50 states, New York City, the District of Columbia, and the U.S. territories are collated and published weekly as numbered tables. Cases reported by state health departments to CDC for weekly publication are subject to ongoing revision of information and delayed reporting. Therefore, numbers listed in later weeks may reflect changes made to these counts as additional information becomes available. Case counts in the tables are presented *as published* each week. See also [Guide to Interpreting Provisional and Finalized NNDSS Data](#).
- Weekly tables since 1996 are available on [CDC WONDER](#).
- Weekly tables since 2014 are available on [Data.CDC.gov](#).
- Weekly tables for 1952-2017 published in the MMWR are available at [CDC Stacks MMWR](#), and weekly tables starting in 2018 are available at [CDC Stacks NNDSS](#) (once in CDC Stacks NNDSS select "Weekly Tables" in the "Genre" box at the left).
- Notices, errata, and other notes are available in the [Notice To Data Users](#) page.
- The list of national notifiable infectious diseases and conditions and their national surveillance case definitions are available at <https://www.cdc.gov/nndss/conditions/>. This list incorporates the Council of State and Territorial Epidemiologists (CSTE) position

statements approved by CSTE for national surveillance.
