

Nationally Notifiable Infectious Diseases and Conditions, United States: Weekly Tables

(Starting week 1 of year 2020, Figure 1 will be discontinued.)

(Accessible Version: <https://wonder.cdc.gov//nndss/static/2019/41/2019-41-figure1.html>)

FIGURE I. Selected notifiable disease reports, United States, comparison of provisional 4-week totals October 12, 2019, with historical data

The figure above is a bar chart showing selected notifiable disease reports for the United States with comparison of provisional 4-week totals through October 12, 2019, with historical data. Reports of acute hepatitis A, acute hepatitis C and mumps increased. Reports of giardiasis, acute hepatitis B, legionellosis, measles, meningococcal disease and pertussis decreased.

* Ratio of current 4-week total to mean of 15 4-week totals (from previous, comparable, and subsequent 4-week periods for the past 5 years). The point where the hatched area begins is based on the mean and two standard deviations of these 4-week totals.

Notes:

- These are **weekly** cases of selected infectious national notifiable diseases, from the National Notifiable Diseases Surveillance System (NNDSS). NNDSS data reported by the 50 states, New York City, the District of Columbia, and the U.S. territories are collated and published weekly as numbered tables. Cases reported by state health departments to CDC for weekly publication are subject to ongoing revision of information and delayed reporting. Therefore, numbers listed in later weeks may reflect changes made to these counts as additional information becomes available. Case counts in the tables are presented *as published* each week. See also [Guide to Interpreting Provisional and Finalized NNDSS Data](#).
- Weekly tables since 1996 are available on [CDC WONDER](#).
- Weekly tables since 2014 are available on [Data.CDC.gov](#).
- Weekly tables for 1952-2017 published in the MMWR are available at [CDC Stacks MMWR](#), and weekly tables starting in 2018 are available at [CDC Stacks NNDSS](#) (once in CDC Stacks NNDSS select "Weekly Tables" in the "Genre" box at the left).
- Notices, errata, and other notes are available in the [Notice To Data Users](#) page.
- The list of national notifiable infectious diseases and conditions and their national surveillance case definitions are available at <https://wwwn.cdc.gov/nndss/conditions/>. This list incorporates the Council of State and Territorial Epidemiologists (CSTE) position statements approved by CSTE for national surveillance.
